Surveillance for Hepatocellular Carcinoma: How Can We Do ...

<https://www.sciencedirect.com/science/article/pii/S000296291530519X>

Oct 01, 2013 · Most studies found **surveillance** rates below 30%, although rates of 60% to 80% were reported in single-center studies from tertiary care and/or community practices. 36 Subspecialty care seems to be the strongest predictor of **surveillance** rates, with patients who received subspecialty care from gastroenterologists/hepatologists having significantly higher **surveillance** rates than patients ...
