

## ANSWERING REVIEWERS

January 8, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 6536-review.doc).

**Title:** Solitary fibrous tumors in abdomen and pelvis: Imaging characteristics with radiologic-pathologic correlation

**Author:** Xue-Ming Li, Jing Reng, Peng Zhou, Ying Cao, Zhu-Zhong Cheng, Yan Xiao, Guo-Hui Xu

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 6536

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision except the second one has been made according to the suggestions of the reviewer.

The reviewer suggested that several sentences in discussion need some corrections as below.

(1) Although rare, radiologists and surgeons must be aware of SFTs of in the abdomen and pelvis. -> aware of SFTs in the abdomen and pelvis. [Thank you very much, we accept it.](#)

(2) Extrathoracic SFTs was typically demonstrated as a large, slow-growing soft tissue tumor. -> I think that SFTs are plural. [We do not receive the reviewer's suggestion because this was cited from the fourth reference. So, we think it should be: Extrapleural SFTs. Thank you very much.](#)

(3) General histological features that may help identify -> to identify. [Thank you very much, we accept it.](#)

(4) In addition, malignant SFTs tend to lose CD34 immunoreactivity and over express Ki-67, p53 and S-100 [16]. -> P53. [Thank you very much, we accept it.](#)

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Guo-Hui Xu, MD
