## Therapeutic plasma exchange in acute liver failure

<https://pubmed.ncbi.nlm.nih.gov/31348553>

Background: Multi-organ dysfunction in acute liver failure (ALF) has been attributed to a systemic inflammatory response directly triggered by the injured liver. High-volume therapeutic plasma exchange (HV-TPE) has been demonstrated in a large randomized controlled trial to improve survival. Here, we investigated if a more cost-/ resource effective low-volume (LV) TPE strategy might have comparable ...
