SPECIFIC COMMENTS TO AUTHORS

The authors present 3 interesting cases of postmenopausal Ovarian Steroid Cell Tumors (OSCTs) of which two were essentially without hyperandrogenic clinical manifestations. The article covers in detail the three cases. 1. However the discussion needs to be more comprehensive and fails to cover the important articles in this field. Few important articles are listed J Clin Endocrinol Metab 97: 2584–2588, 2012 Volume 12 / Issue 10 / October 2016 n Journal of Oncology Practice DOI: 10.1200/JOP.2016.016261 Pathology (January 2018) 50(1), pp. 5–15, <https://doi.org/10.1016/j.pathol.2017.09.007> Cancers 2020, 12, 1398; doi:10.3390/cancers12061398 Al Harbi R, et al. Int J Gynecol Cancer 2021;31:161–168. doi:10.1136/ijgc-2020-002018 2. Also there are international registries for these uncommon tumors which give insight into the data from multiple centres and would be informative to the reader of your article. <https://www.otstregistry.org/> 3. References need to be put at 2 places marked in the text as comment. (File attached)
