SPECIFIC COMMENTS TO AUTHORS

Good scientific quality review. Scientific topic of important clinical relevance sufficiently deepened with an orderly, simple and understandable exposition of the modern diagnostic concepts relating to NAFLD. Bad order, however, in the drafting of the references (see notes attached to the text). Regarding the references, although many of these updated until 2020, the article must be completely rewritten in compliance with the editorial guidelines of the journal.

SPECIFIC COMMENTS TO AUTHORS

Manuscript is really detailed and explanatory, providing an exceptional overview of a disease that seems to be under-recognized in clinical practice. I would only recommend adding some further studies addressing the effect of antidiabetic agents of NAFLD: see PMID: 31013454, PMID: 32961563.
