### Coronavirus disease 2019 and the liver: What do we know so far?

Nasa P *et al.* COVID-19 and liver

Prashant Nasa, George Alexander

#### Abstract

The coronavirus disease 2019 (COVID-19) pandemic has caused unprecedented pressure on public health and healthcare. The pandemic surge and resultant lockdown have affected the standard-of-care for many medical conditions and diseases. The initial uncertainty and fear of cross-transmission of SARS-CoV-2 have changed the routine management of patients with pre-existing liver diseases, hepatocellular carcinoma, either listed for or received a liver transplant. COVID-19 is better described as a multisystem disease caused by severe acute respiratory

### Liver injury in COVID-19: The hepatic aspect of the ...

<https://pubmed.ncbi.nlm.nih.gov/33442447>

The 2019 novel coronavirus disease (COVID-19) pandemic due to severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) has posed a serious threat to global public health. Although primarily, the infection causes lung injury, liver enzyme abnormalities have also been reported to occur during the course of the disease.
