World Journal of Cardiology.

Re: Revised version Manuscript NO: 65466

Dear Editor,

We would like to thank you and the reviewer for your interesting comments and constructive criticisms of our invited manuscript entitled: "Quantifying tissue perfusion after peripheral endovascular procedures. Novel tissue perfusion endpoints to improve outcomes." that was submitted for publication in the World Journal of Cardiology.

We have followed the reviewer's remarks and hope that we address all comments adequately. Please find attached a point-by-point list of all the changes made. We also attach separately an annotated text file with numbered lines where you can refer for each change and revision made a clean revised manuscript.

Yours sincerely,

Stavros Spiliopoulos, MD, PhD, EBIR

Associate Professor of Interventional Radiology

National and Kapodistrian University of Athens, Greece

Point by point reply

Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Minor revision

Specific Comments to Authors: The article summarizes the subject well together with the literature. However, an important deficiency is that there are no pictures in an article about radiology. Therefore, figures related to the subject should be added to the article.

Authors response: The authors would like to thank the reviewer for his comments and agree that images were necessary. We submitted 2 figures related to the subject.

The authors also performed minor language polishing, as suggested by the reviewer (please see annotated manuscript).
