The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study. The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (i.e., chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear. Statistical symbols are accurate. Statistical significance is expressed as "P < 0.05, bP < 0.01 (P > 0.05 usually does not need to be denoted). The 'D	ISCUSSION' section (1) describes the main purpose and	[N]
hypoth	esis of the study; (2) summarizes the most important results;	
(3) illus	strates and explains the results (but does not simply repeat	
the dat	a) and draws conclusions or inferences based on the results;	
(4) poin	nts out the limitations of the study and their impact on the	
results,	as well as proposes further advice on future research	
topic(s)	or direction(s); and (5) describes the theoretical significance	
and pra	actical value of the findings.	
The 'A	CKNOWLEDGEMENTS' section expresses gratitude to any	[Y]
individ	uals or organizations for technical support (i.e., providing	
instrun	nentation, equipment or experimental materials, and/or	
20 assistar	nce in experimental work), non-technical services (i.e., useful	
inspira	tion, suggestions, guidance, or review), and/or any other	
auxilia	y work.	
21 The 'A	ARTICLE HIGHLIGHTS' section provides comments for	[N]
	l articles in accordance with the specified format.	
The 'R'	EFERENCES' section lists the references in the Vancouver	[Y]
style. T	his style uses Arabic numeral in-text citations based on the	
order o	of the first appearance of a source in the text. For citations	
where	the author's name is indicated in the text, a superscript	
numbe	r should be placed following the name (i.e, "Pang et al"). For	
citation	s where no author is indicated, a superscript number should	
be place	ed at the end of the sentence. Respective examples are: "Ma[1]	
reporte	d", "Pan et al ^[2-5] indicated"; "PCR has a high	
sensitiv	rity ^[6,9] ." No superscript numbers are used when the	
referen	ce number is described in the text; for example, "The	
experim	nental method used has been described in reference [8]." The	
style of	reference citations in tables is the same as that in the text	
(e.g., Pa	n <i>et al</i> ^[2-5] , please see reference [8]).
