

PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 65604

Title: Diverse Microbiota in Palatal Radicular Groove Analyzed by Illumina Sequencing:
Cases Report

Reviewer's code: 05077783

Position: Peer Reviewer

Academic degree: MD, MSc

Professional title: Surgeon

Reviewer's Country/Territory: Brazil

Author's Country/Territory: China

Manuscript submission date: 2021-04-14

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-04-14 16:12

Reviewer performed review: 2021-04-16 15:24

Review time: 1 Day and 23 Hours

SPECIFIC COMMENTS TO AUTHORS

The authors present a study of the palatal radicular groove microbiota, based on a series of four cases. The case is clearly written and accompanied by high quality illustrations.

SPECIFIC COMMENTS TO AUTHORS

Dear authors, first of all, please, check carefully submitted supplements. The CARE Checklist needs to be filled up. Since you present the cases of 4 patients, Informed consents of all patients should be submitted instead of only one. The manuscript itself is written in good English. The authors used appropriate approach for the analysis of microbiota in palatal radicular groove and qualitatively illustrated the data obtained. However, since the authors presented this manuscript as the clinical case report, it is necessary to provide more details about patients' disease history, treatment and follow up. These issues need to be discussed in more details in the Discussion section, as well. Otherwise, authors should present this manuscript as a clinical research.
