Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade A (Priority publishing)

Conclusion: Accept (General priority)

Specific Comments to Authors: The authors present a very unusual topic. This implies that there are few references to compare results. At the same time, it is a strength for the manuscript because it adds knowledge to something unusual. It is the presentation of a case. The objective is to provide information on a little-studied topic. The authors do this, thus meeting the objective of the study. Many studies of this type are needed to describe the characteristics of this pathology. It's the beginning of a long road. All the principles are important, so I think it should be published.

Thanks for the comment. This is a very important comment. As the reviewer said, cerebral proliferative angiopathy (CPA) is a rare ischemic vascular disease, and hemorrhagic transformation after ischemia has been seldom reported. In recent years, increased research attention has been paid to this disease. The pathogenesis, clinical manifestations, diagnosis, and treatment of CPA have been initially established. However, in the future, more high-quality clinical research is to be conducted to further explore its pathogenesis, improve therapeutic schedules for minimizing its disability, and reduce mortality. Finally, we really appreciate the opinion from the reviewer.

#### EDITORIAL OFFICE'S COMMENTS
