SPECIFIC COMMENTS TO AUTHORS

Dear authors, I commend your work to contribute to the features of the GCT-ST in MRI which would elucidate the malignant lesion from the benign ones and aid in their differentiation and diagnosis using DWI and ADC values. I have a few minor corrections to be made to the manuscript before accepting the article for publication. 1. Expand the abbreviations when used for the first time in the manuscript Eg Line No 54,55,56 2. Line No 112 The features listed are region specific and hence it would be better to be specific about the region of presentation before listing the features 3. Rephrase Line 115-116
