#### **SPECIFIC COMMENTS TO AUTHORS**

This manuscript "Protein-Protein Interactions: Methods, Databases and Applications in Virus-Host Study" reported a very good overview of the protein-protein interactions databases and application in the field of virology. However, I will recommend some minor suggestions to further improve the manuscript. Discussion on some practical examples showing experimental proofs on the use of these databases in designing therapeutics would benefit the readers. How the review may help researcher in the fight against COVID-19. Minor English editing is also needed.
