Pain Management in Acute Pancreatitis | Pancreapedia

<https://www.pancreapedia.org/reviews/pain-management-in-acute-pancreatitis> ▾

One reason for the challenge behind pain management is the high complexity of AP itself. Whereas mild to moderate epigastric pain is often the single symptom of edematous pancreatitis, patients with necrotizing acute pancreatitis often suffer from severe pain attacks, pleural effusion, ascites and even multiple organ failure.
