Sep 01, 2018 · Geographic distribution of stage 1 posterior vitreous detachment (PVD). Incidence of stage 1a PVD is high in the order of superior > inferior > nasal > temporal quadrant ( $P = 2.4 \times 10^{-8}$ ). Incidence of stage 1b PVD is still highest in the superior quadrant, but the significance is lower ( $P = 2.8 \times 10^{-2}$ ) than stage 1a PVD. All stage 1 PVDs (100%) originated and located in the midperipheral ...

Purpose To investigate the effect of posterior vitreous detachment (PVD) on aflibercept response in treatment-naive diabetic macular oedema (DME). Design A retrospective cohort study. Methods One hundred and fifty eyes of 150 treatment-naive patients with DME were enrolled. The patients were divided into three groups according to their PVD status: group 1 (no PVD during injections), group 2 ...
