Therapeutic drug monitoring in inflammatory bowel disease ...

<https://pubmed.ncbi.nlm.nih.gov/30973355>

Purpose of review: The current review provides an updated overview on the role of **therapeutic drug monitoring** (TDM) of biological therapies in **inflammatory bowel disease** (IBD). We examine the data behind TDM for the antitumor necrosis factor agents, vedolizumab and ustekinumab, in patients with IBD.

Therapeutic drug monitoring in Inflammatory Bowel Disease ...

<https://pubmed.ncbi.nlm.nih.gov/31589357>

Background: **Therapeutic drug monitoring** (TDM) of infliximab (IFX) levels in **inflammatory bowel disease** (IBD) patients can help to guide dose adjustments or changes to therapy for selected patients in remission or with secondary loss of response.

Inflammatory Bowel Disease

Medical Condition

A group of intestinal disorders that cause inflammation of the digestive tract. This causes abdominal pain, cramping and unexplained weight loss.

- Common (More than 200,000 cases per year in US)
- Often requires lab test or imaging
- Treatments can help manage condition, no known cure
