Lumbar Disc Herniation - National Institutes of Health

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5685963>

Oct 04, 2017 - Pathology of LDH. The intervertebral disc consists of an inner nucleus pulposus (NP) and an outer annulus fibrosus (AF). The central NP is a site of collagen secretion and contains numerous proteoglycans (PG), which facilitate water retention, creating hydrostatic pressure to resist axial compression of the spine [3, 4] The NP is primarily composed of type II collagen, which accounts for ...

Lumbar Disc Herniation - National Institutes of Health

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5685963>

Oct 04, 2017 · Pathology of LDH. The intervertebral disc consists of an inner nucleus pulposus (NP) and an outer annulus fibrosus (AF). The central NP is a site of collagen secretion and contains numerous proteoglycans (PG), which facilitate water retention, creating hydrostatic pressure to resist axial compression of the spine [3, 4].The NP is primarily composed of type II collagen, which accounts for ...
