SPECIFIC COMMENTS TO AUTHORS

This study titled " Retraction of lumbar disc herniation achieved by noninvasive techniques: A case report" needs major revisions. Comments: 1- Abstract needs many corrections; - Add clear objectives. - Methods need more details about the outcome measures. - Conclusion should be concise and has to answer the study question. 2-

The introduction section cannot cover all the elements of the study. - Define LDH in detail. - Clarify the significance and importance of the study. - Add the objective and hypothesis of the study. 3-Methods: - More information are still required about the case reported. - Explain the outcome measure in detail with validity and reliability (add references). - Treatment: discuss manipulation, acupuncture, in details (areas, positions, time, frequency, intensity, and applications) - For, the three-dimensional (balanced regulating), the authors only mentioned the steps without details of the procedure. Also, add references 4-Discussion: - The introductory paragraph should demonstrate the main findings of the study. - The findings should be compared with previous or related studies. - Implications of the study should be explained. - The limitations of the study should be demonstrated. - Briefly, the discussion section need major revisions.
