SPECIFIC COMMENTS TO AUTHORS

First of all, I would like to thank you for the opportunity to evaluate this interesting review. It is a narrative review, proposed, broad objective. It is a text with relevant revision of the literature and with narrative coherence. It is of great use and suitable. Comments the most important published studies, with consistent critical analysis. Available with image quality and features of each cholangioscope model. See the future of the technique in an interesting and rational way. In analyzing the conclusion of this review, I suggest that it be more incisive, in the matter of the routine use of this technique, as well as the future role of artificial intelligence. Once again, I congratulate the authors and approve them for publication.
