[Intensive low-density lipoprotein cholesterol lowering in ...](#)

<https://heart.bmj.com/content/early/2021/03/31/heartjnl-2020-318760> ▾

Mar 31, 2021 · Elevated levels of low-density lipoprotein cholesterol (LDL-C) are associated with increased risk of coronary heart disease and stroke. Guidelines for the management of dyslipidaemia from the European Society of Cardiology (ESC) and the European Atherosclerosis Society (EAS) were updated in late 2019 in light of recent intervention trials involving the use of innovative lipid-lowering ...
