#### **SPECIFIC COMMENTS TO AUTHORS**

The replace of the pictures in Figure 3 has no problem. However, It concerns me that the authors do not understand the difference between adenovirus and lentivirus. Maybe they used lentivirus vectors, since transfection by adenovirus is transient so that screening with puromycin for 3 weeks is impossible. I recommend the authors also to correct the manuscript and caption for Figure 3.

#### **SPECIFIC COMMENTS TO AUTHORS**

I think that the authors has replaced the wrong images (Figure 3 A, B, C are correct images, so the authors kept the original pictures and Figure 3 D,E,F are wrong images, so they replaced them) with correct ones . This technical error does not change the meaning of the picture or hinder the conclusion of the article. I agree this decision.
