Optimization of transdisciplinary management of elderly with femur proximal extremity fracture: A patient-tailored plan from orthopaedics to rehabilitation

de Sire A *et al.*, 2021 PFF transdisc assist

Alessandro de Sire, Marco Invernizzi, Alessio Baricich, Lorenzo Lippi, Antonio Ammendolia, Federico Alberto Grassi, Massimiliano Leigheb

Abstract

Fractures of femur proximal extremity (FFPE) are the most common fragility fractures requiring hospitalization, with a high risk of mortality, low independence in the activities of daily living, and severe consequences on health-related quality of life.
