## The Wire and Beyond: Recent Advances in Breast Imaging ...

<https://pubmed.ncbi.nlm.nih.gov/31560614>

For decades, wire localization has been the standard for preoperative localization in breast imaging. With this method, a wire is placed in the breast percutaneously, with the distal wire segment...

## [PDF] Migration of the Breast Biopsy Localization Wire to the ...

<https://www.tandfonline.com/doi/pdf/10.1080/02841850510015956>

Migration of wire to extramammary sites, especially into the thoracic cavity, is rare (1, 3, 4). We report a case in which migration of the localization wire into the thorax cavity was demonstrated on...

## [PDF] Reflector-guided Localization of Non-palpable Breast ...

<https://www.merit.com/wp-content/uploads/2020/07/...>

Jul 12, 2020 · Background: Wire-guided localization (WGL) has been the mainstay for localizing non-palpable breast lesions before excision. Due to its limitations, various wireless alternatives have been...

## Breast biopsy with wire localization: Factors influencing ...

<https://www.researchgate.net/publication/11074327...>

Our aim was to find out the factors influencing the complete excision of nonpalpable carcinoma. During a 2-year period, 215 patients (median age 55 years) underwent biopsy after wire localization ...

### Feasibility of magnetic marker localisation for non ...

<https://www.sciencedirect.com/science/article/pii/S0960977617300486>

Jun 01, 2017 · Objectives. Accurate tumour localisation is essential for breast-conserving surgery of non-palpable tumours. Current localisation technologies are associated with disadvantages such as logistical challenges and migration issues (wire guided localisation) or legislative complexities and high administrative burden (radioactive localisation).
