

[Acute myocardial infarction associated with thrombotic ...](#)<https://jmedicalcasereports.biomedcentral.com/...>

Oct 30, 2017 · This is the first case report of a patient developing a myocardial infarction during the recovery phase of thrombotic microangiopathy following a hump-nosed viper bite. The possibility of thrombotic risk related to thrombotic microangiopathy following hump-nosed viper bite is an area that is poorly studied; it needs further attention.

Mar 14, 2011 · **Coronary artery thrombosis in thrombotic thrombocytopenic purpura** (TTP) has been established in multiple autopsy studies, but TTP presenting primarily with cardiac symptoms has rarely been reported. 1 Furthermore, treating **myocardial infarction** in this subset of thrombocytopenic patients with antiplatelet agents like aspirin and clopidogrel has an increased risk of bleeding. Also, ...

Acute myocardial infarction associated with thrombotic ...

<https://jmedicalcasereports.biomedcentral.com/...>

Oct 30, 2017 · Hump-nosed viper bite is the commonest cause of venomous snakebite in Sri Lanka. Despite initially being considered a moderately venomous snake more recent reports have revealed that it could cause significant systemic envenoming leading to coagulopathy and acute kidney injury. However, myocardial infarction was not reported except for a single case, which occurred immediately after ...

ADAMTS13 and von Willebrand Factor in Thrombotic ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4599565>

Pathogenesis of thrombotic thrombocytopenic purpura (TTP) was a mystery for over half a century until the discovery of ADAMTS13. ADAMTS13 is primarily synthesized in the liver, and its main function is to cleave von Willebrand factor (VWF) anchored on the endothelial surface, in circulation, and at the sites of vascular injury.
