

Response to reviewer and editor:

Reviewer's comments:

1.I have read your article "Current evidence on potential of adipose derived stem cells to enhance bone regeneration and future projection" and found that the subject matter is unique and worthy of conversation. This material may be of interest if you can improve on it.

2.In the paragraph of background, you should pay more attention to the ADSCs and the readers could get access to the core of this article quickly.

We have addressed this comment by expanding on discussion of ADSCs in the background section, which can be found on pages 3 and 4.

3.Typing and context errors may still remain in some paragraphs, such as "ASDSCs".

We have addressed this comment by making changes throughout the manuscript. The specific error noted by the reviewer has been rectified on page 13.

Editor's comments:

(1) The title is too long, and it should be no more than 18 words;

The current title is fewer than 18 words

(2) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor;

We have added the original pictures to a separate PPT, which will be included in the submission of the revised manuscript.

(3) PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout;

PMID and DOI numbers have been added appropriately to the reference list, which can be found on pages 29-39.

(4) Please obtain permission for the use of picture(s). If an author of a submission is re-using a figure or figures published elsewhere, or that is copyrighted, the author must provide documentation that the previous publisher or copyright holder has given permission for the figure to be re-published; and correctly indicating the reference source and copyrights. For example, "Figure 1 Histopathological examination by hematoxylin-eosin staining (200 ×). A: Control group; B: Model group; C: Pioglitazone hydrochloride group; D: Chinese herbal medicine group. Citation: Yang JM, Sun Y, Wang M, Zhang XL, Zhang SJ, Gao YS, Chen L, Wu MY, Zhou L, Zhou YM, Wang Y, Zheng FJ, Li YH. Regulatory effect of a Chinese herbal medicine formula on non-alcoholic fatty liver disease. World J Gastroenterol 2019; 25(34): 5105-5119. Copyright ©The Author(s) 2019. Published by Baishideng Publishing Group Inc[6]". And please cite the reference source in the references list. If the author fails to properly cite the published or copyrighted picture(s) or table(s) as described above, he/she will be subject to withdrawal of the article from BPG publications and may even be held liable.

All of the pictures used in our manuscript are original pictures. Thus, there is no need to for additional copyright documentation.
