Mar 09, 2021 · Alternatively, endoscopic trans-papillary drainage can be performed in cases with small (<5 cm) pseudocysts communicating with the PD. 68, 69 The management of CP-related ascites and pleural effusion includes placement of a trans-papillary plastic stent to bridge the PD leak. 70

Duodeno-pancreatic and extrahepatic biliary tree trauma ...<https://wjeb.biomedcentral.com/articles/10.1186/s13017-019-0278-6>

Dec 11, 2019 · Duodeno-pancreatic and extrahepatic biliary tree injuries are rare in both adult and pediatric trauma patients, and due to their anatomical location, associated injuries are very common. Mortality is primarily related to associated injuries, but morbidity remains high even in isolated injuries. Optimal management of duodeno-bilio-pancreatic injuries is dictated primarily by hemodynamic ...

Retrospective Study

Sequential therapy of combined trans-papillary endoscopic naso-pancreatic and endoscopic retrograde pancreatic drainage for pancreatic pseudocysts

He YG *et al.* Two-step sequential therapy of pancreatic pseudocysts

Yong-Gang He, Jing Li, Xue-Hui Peng, Jing Wu, Ming-Xun Xie, Yi-Chen Tang, Lu Zheng, Xiao-Bing Huang

Abstract

BACKGROUND

Endoscopic retrograde pancreatic drainage (ERPD) and stent implantation has become the major treatment method for pancreatic pseudocysts. However, it is associated with a
