

Supplementary material

Table 1 Correctness of the answers

	Child score		Parent score	
	%	n	%	N
Item No 1 (the length of large bowel)	65.77	196	80.54	240
Item No 2 (the correct order of digestive tract)	73.49	219	87.58	261
Item No 3 (no risk of IBD transmission)	68.79	205	87.92	262
Item No 4 (the aetiology of IBD)	53.02	158	65.77	196
Item No 5 (relationship between emotional stress and IBD flare-up)	73.83	220	90.6	270
Item No 6 (IBD can affect other organs)	36.24	108	58.39	174
Item No 7 (osteoporosis is related to IBD, steroids, and poor nutrition)	37.25	111	56.38	168
Item No 8 (growth of IBD patients in remission)	35.23	105	43.62	130
Item No 9 (risk of colon cancer)	40.6	121	36.58	109
Item No 10 (the life expectancy in patients with IBD)	61.07	182	61.07	182
Item No 11 (reasons to perform a colonoscopy)	42.62	127	50.67	151
Item No 12 (role of salicylates and azathioprine in maintenance therapy)	35.57	106	42.62	127
Item No 13 (the need to use medications during remission)	74.83	223	80.87	241
Item No 14 (side effects of corticosteroids)	29.19	87	28.19	84
Item No 15 (patient's action in response on side effects of corticosteroids)	29.87	89	39.6	118
Item No 16 (herbal remedies can have adverse effects and interact with drugs)	20.81	62	28.19	84
Item No 17 (role of surgery in CD and UC)	13.76	41	11.74	35
Item No 18 (IBD is familial)	53.02	158	66.78	199
Item No 19 (genetic predisposition of IBD)	44.97	134	44.63	133
Item No 20 (no foods proven to cause IBD flare-up)	12.08	36	21.14	63
Item No 21 (nutritional deficiencies)	33.22	99	38.59	115
Item No 22 (role of enteral nutrition)	22.82	68	32.21	96
Item No 23 (proper meaning of the word: "placebo")	23.83	71	34.23	102

Table 2 Hierarchical linear regression for patient's inflammatory bowel disease-knowledge inventory device score as an independent variables

Independent variables	Model 1		Model 2		Model 3	
	B (SE)	Bet a value	B (SE)	Beta P value	B (SE)	Beta P value
Patient's sex	-1.01 (0.47)	-0.031 0.13	-0.97 (0.44)	-0.12 (0.44)	-1.03 (0.44)	-0.13 0.021
Place of residence	1.06 (0.47)	0.13 0.026	0.47 (0.45)	0.06 (0.45)	0.41 (0.45)	0.05 0.37
