**Manuscript Type:** ORIGINAL ARTICLE

*Observational Study*

**Health-related risky behaviors and their risk factors in adolescents with high-functioning autism**

Observational study of 110 adolescents with HFA

**Abstract**

BACKGROUND

Health-related risky behaviors generally refer to behaviors that have a negative impact on health and quality of life. Health-related risky behaviors in adolescents with high-functioning autism (HFA) have not been well understood so far. Adolescents with HFA may have more health-related risky behaviors than neurotypical adolescents.

## Adolescent mental health - World Health Organization

<https://www.who.int/news-room/fact-sheets/detail/adolescent-mental-health> ▾

**Introduction**

Mental Health Determinants

Emotional Disorders

Adolescence (10-19 years) is a unique and formative time. Multiple physical, emotional and social changes, including exposure to poverty, abuse, or violence, can make adolescents vulnerable to mental health problems. Promoting psychological **well-being** and protecting adolescents from adverse experiences and risk factors that may impact their potential to thrive are critical for their well-being...
