SPECIFIC COMMENTS TO AUTHORS

“Associations of New-Onset Atrial Fibrillation and Severe Visual Impairment in Type 2 Diabetes: A Multicenter Nationwide Study” is a single multicenter nationwide observational study. The aim is to evaluate the prevalence of visual impairment in patients with diabetes mellitus and AF. I believe the study was well conducted. The authors followed a simple but effective methodology. The results are clear and overall, the manuscript is easy to read with an interesting message. **FINAL DECISION:** Accept
