SPECIFIC COMMENTS TO AUTHORS

The case presentation can be made more concise. Multiple sub-headings are not necessary, please make it one or two paragraphs. It appears like your patient was on bed rest for a long time. Why was the patient not mobilized early with crutches ? Discussion- Please edit the details of other case reports to make them more concise. There are few more case reports of neck and intertrochanteric fractures in young, please discuss about their implant choice, complications and post -op rehab regimen.
