Nonimmune hydrops fetalis: case reports and brief review

https://pubmed.ncbi.nlm.nih.gov/1479460

We report two cases of nonimmune hydrops fetalis diagnosed prenatally. One fetus died in utero, and the second fetus survived and the infant was discharged from the intensive care nursery at 4 weeks of age. A brief review of the literature and the difficulties in arriving at a diagnosis and the mana ...

**Abstract**

**BACKGROUND**

Fetal hydrops is a serious condition difficult to manage, often with a poor prognosis, and it is characterized by the collection of fluid in the extravascular compartments. Before 1968, the most frequent cause was the maternal-fetal Rh incompatibility, today 90% of the cases are non-immune hvdrons fetalis. Multinle fetal anatomic and
