[Computerized tomography findings in calcified signet-ring ...](#)<https://pubmed.ncbi.nlm.nih.gov/29699526>

Background: Calcification in primary gastric cancer is very rare. In this report, we describe the computerized tomography (CT) changes in calcification in a patient with locally advanced signet-ring gastric cancer treated with chemotherapy. Case presentation: A 49-year-old man presented with 5 months' history of abdominal pain, anorexia, and rapid weight loss. He had undergone Billroth-II ...
