## **SPECIFIC COMMENTS TO AUTHORS**

Dear Authors, Thank you for your submitting the manuscript entitled, "Asymptomatic Gastric Adenomyoma and Heterotopic Pancreas in a Patient with Pancreatic Cancer: Case Report and Literature Review" in WJCC. The manuscript is well written and interesting, however, several criticisms should be addressed as the followings. Minor 1. First, I cannot find the page numbers in the manuscript. 1. Abstract: Please modify according to WJCC style. 2. Abstract: Line 1-2; I think "GA is and a rare submucosal benign tumor (or neoplasm) that arises mostly ..." is correct. Of course, please check and correct the English notation and grammar of the full text of this manuscript. 3. Abstract: CASE SUMMARY Line 2.; Please insert the term of "to date" just after "first reported case". Line 7.; Please change "caudal pancreatic cancer" to "caudal PC (abbreviation)". 4. CASE REPORT: In general, Please delete the unnecessary and unimportant content in a concise manner. Please modify according to the style of WJCC. 5. DISCUSSION You say that GA is a very rare disease. However, in 2017, Sinan Wang et al. have reported that 17 of the 571 cases that could not be fully resected by ESD were GA. so I think GA is not so rare. GA is a disease concept that has malignant potential, with some malignant cases, but most of them are benign submucosal tumors, and there may be quite a lot of cases that do not reach the pathological diagnosis of GA, I think. Is GA really rare? In this regard, add more recent references and add your own opinions to the "Discussion" section. 6. GA, HP, are stated to originate from the same origin. Regarding the developmental process of GA, HP, PC, etc., along with the developmental process of the pancreas, please add (a) new schematic figure(s) and add more explanations to avoid misunderstandings for all the readers of WJCC. Thanks again for this phase of manuscript reviewing, and look forward hearing from you in the near future.
