**Intracortical screw insertion plus limited open reduction in treating type 31A3  
irreducible intertrochanteric fractures in the elderly**

Treatment of type 31A3 intertrochanteric fractures

Xiao-Wen Huang, Gu-Qi Hong, Qiang Zuo, Qun Chen

### **Abstract**

#### **BACKGROUND**

In most elderly patients with intertrochanteric fractures, satisfactory fracture reduction can be achieved by closed reduction using a traction table. However, intertrochanteric fractures cannot achieve satisfactory reduction in a few patients, which is called

### Intracortical Screw Insertion Plus Limited Open Reduction ...

Author: Xiao-wen Huang, Gu-qi Hong, Qiang Zu...Publish Year: 2021

Conclusion: With careful preoperative preparation, intracortical screw insertion plus limited open reduction could achieve high-quality fracture reduction and fixation in elderly patients with type 31A3 irreducible intertrochanteric fractures. Good clinical outcomes were achieved without increasing operation time and intraoperative blood loss.
