Lauren classification identifies distinct prognostic value ...
<https://link.springer.com/article/10.1007/s00262-020-02550-7>
Mar 21, 2020 · Due to the small number and the similarity with diffuse type gastric cancer in clinical and prognostic aspects, the Lauren classification mixed type gastric cancer was combined into the diffuse type in our analysis as previous studies [15, 16]. Overall survival was calculated from the date of gastrectomy to the date of death or the last follow-up.

Superiority of Tumor Location-Modified Lauren ...
<https://www.ncbi.nlm.nih.gov/pubmed/30051368>
BACKGROUND: The tumor location-modified Lauren classification (mLC) has been proposed recently, but its clinical significance remains under debate. This study aimed to elucidate the clinical relevance of mLC and evaluate its superiority to the Lauren classification (LC) for gastric cancer patients with gastrectomy.

Clinical Relevance of the Tumor Location-Modified Lauren ...
europepmc.org/articles/PMC4604333
Sep 01, 2015 · This is supported by other studies that showed that the anatomical location of gastric cancer has clinical relevance: gastric cardia or proximal third gastric adenocarcinoma is associated with a worse prognosis than middle- or distal-third gastric cancer.18,19,20 As a result, Shah et al.9 hypothesized that a modification of the Lauren classification that takes into account the anatomical location of the tumor may be even more useful than the existing Lauren classification.

Abstract

BACKGROUND

It remains controversial as to which pathological classification is most valuable in predicting the overall survival (OS) of patients with gastric cancer (GC).
