Dear editor,

Please find attached files of revised manuscript in word format

**Patients' awareness about their own breast cancer characteristics**

**Author:** Chong Geng<sup>1</sup>, Guojun Lu<sup>2</sup>, Jing Zhu<sup>3</sup>, Yuyang Li<sup>4</sup>

**Name of Journal:** World Journal of Clinical Cases

**Manuscript NO:** 67083

First of all, thank you for your careful guidance of this article. Revision has been made according to the suggestions of the reviewer:

**Reviewer:** 06075089

This is an interesting study of breast cancer characteristics. It is critical that breast cancer patients understand the characteristics of their own cancer, including the stage of the tumor and its hormone receptor and HER2 status. In this study, the authors designed and administered a survey to determine breast cancer patients' knowledge about their own cancer, and the extent to which this information is correct. This study is well designed and the results are very interesting. The survey is reasonable, and analysis of the cancer characteristics are good. Minor comments: 1. There are some minor language polishing, which should be checked and corrected. 2. The discussion and conclusion section should be divided into two parts. 3. Tables should be also edited.

Thank you for your advice.

After receiving the comments, We read the article in detail, corrected the language errors in the manuscript, edited the discussion and conclusions into two parts, and the form is re-edited.

Thank you again for publishing our manuscript in the World Journal of Clinical Cases.

Sincerely Yours,  
Yuyang Li
