*Editors-in-Chief, World Journal of Cardiology*

Dear Editors-in-Chief,

I hold a certificate in Applied Biostatistics from the Harvard Clinical and Translational Science Centre, and I have thoroughly checked the statistical methodology in the original research article entitled “*Elderly patients with non-cardiac admissions and elevated high-sensitivity troponin: the prognostic value of renal function*” so that it meets the requirements of academic publishing.

Yours sincerely,

Michail I. Papafaklis, MD, PhD, FESC
