SPECIFIC COMMENTS TO AUTHORS

1. How many cases reported of ASALLL in literature so far in pediatric and adult population? 2. Please provide initial working differential diagnosis of the case before diagnosis of ASALLL 3. What are the other treatment options in case if patient is not a surgical candidate and what the prognosis of different treatment modalities. It would be nice if authors can formulate a table with all the published cases and give us overview of the outcomes of cases diagnosed with ASALLL 4. Minor English and spelling errors that needs to be corrected
