

## CHECKLIST OF RESPONSIBILITIES FOR SCIENTIFIC EDITORS

Manuscript page number: 26

Manuscript word count: 6911

Item No.	Specific items for verification	Comments Yes=[Y] No= [N]
1	<p><i>General Information of the Manuscript</i></p> <p><b>Name of journal:</b> World Journal of Virology</p> <p><b>Manuscript NO.:</b> 67311</p> <p><b>Column:</b> Minireviews</p> <p><b>Title:</b> COVID-19 in dialysis units: a comprehensive review</p> <p><b>Authors:</b> Gabriel Martins Nogueira, Moisés Santana Oliveira, Ana Flávia Moura, Constança Margarida Sampaio Cruz and José A. Moura-Neto</p> <p><b>Reviewer code:</b> 05824934, 05382654, and 05869546</p> <p><b>First decision:</b> 2021-06-07 02:46</p> <p><b>Scientific Editor:</b> Jin-Lei Wang</p> <p><b>Date of signature:</b> <u>8/10/2021</u> (month/day/year)</p>	[Y]
2	<p><i>Editorial Office's Comments</i></p> <p><b>Science Editor:</b> 1 Scientific quality: The manuscript reviewed the epidemiology of COVID-19, the screening of healthcare personnel, dialysis patients and visitors, the safety of the dialysis facilities' environment, the conducts regarding an outbreak of SARS-CoV-2 infection, the management of complications in dialysis patients with COVID-19 and the conducts directed towards children with kidney</p>	[Y]

disease in dialysis units, which provided valuable information for prevention and control of SARS-CoV-2 infection in dialysis units. The topic is within the scope of the World Journal of Virology. (1) Classification: Grade 2C1B and Grade 2B1A; (2) Summary of the Peer-Review Report: Reviewer 1: Abstract needs to be rewritten. The objective of this manuscript is not clear from this abstract. Please follow - First sentence should imply question underlying the research study - Next explain what previous research has demonstrated (a rationale for new search or this manuscript) - The data, research and analytical methods used in this manuscript The major findings from an implications and significance of this manuscript A short paragraph is needed in introduction section for pathophysiology of SARS-CoV-2 on Kidneys (role of ACE2 receptor) Introduction section mentions "variety of clinical manifestations" - what are they? Please refer to paragraph here: Dialysis units should be encouraged to decrease the flow of people during the pandemic; therefore, it is not indicated that other individuals accompany patients on dialysis to reduce person to person transmission? (22,25). It can be allowed in situations of extreme need, but it should only be considered on a case-by-case analysis. In this matter, it is recommended that the companions wear surgical masks, N95 or similar and obey the same basic rules as dialysis patients, e.g., social distancing (22,24,25,29). Provide information what is considered "extreme need"? are there CDC or WHO guidelines specific to visitors? Reviewer 2:1. In page 1,

running title and corresponding author should be provided. Additionally, in "Supported by the authors" section, the approved grant application form(s) or funding agency copy of any approval document(s) must be provided. Full name (such as COVID-19 and SARS-CoV-2) should be given for the first time. 2. Please refer to recent papers published in World Journal of Virology and correct the format. In page 2, "Key words" should be changed to "Key Words". "renal dialysis" should be changed to "Renal dialysis". Note that key words should be uppercase or lowercase according to the journal's requirements. Full name (such as HCP) should be given for the first time. In page 2, line 22, "(1,2)" should be changed to "[1,2]". Other citations should be modified accordingly. Throughout the text, all "SARS-Cov-2" should be changed to "SARS-CoV-2". 3. In "DEALING WITH AN OUTBREAK" section, it is suggested that figure 1 and figure 2 could be combined into a single figure and management of visitors could be added in the combined figure. Additionally, figure 1 and figure 2 should be indicated in the corresponding text. In figure legends, all abbreviations should be given in full text according to the journal's requirements. 4. In all references, all journal title should be italics. In reference 1, "J Med Virol. 2020 Jun;92(6):577-583. [DOI: 10.1002/jmv.25757 PMID: 32162702 PMCID: PMC7228329]" should be changed to "J Med Virol 2020; 92:577-583 [PMID: 32162702 DOI: 10.1002/jmv.25757]". In reference 6, " | WHO Coronavirus Disease (COVID-19) Dashboard [Internet]. [cited 2021 Mar 1]" should be

changed to “[cited Mar 1, 2021]”. Please check other references including content and format carefully according to the journal’s requirements. Other suggestiones have been listed in the uploaded revised version. Reviewer 3:1. Page 4, line 1, “HD patients are cannot perform” should be “HD patients cannot perform”; 2. Page 12, line 1, “Although CKD in considerably” should be “Although CKD is considerably”; line 3, “determinate” should be “determine”. The manuscript would be more compendious if some in-depth discussion on the physiopathology of AKI can be included. Although the pathophysiology of AKI is still elusive, clinical evidence shows that the direct viral infection does not account for the observed renal damage. The hyperinflammation induced by the immune system might rather be responsible for kidney injury in severe cases of COVID-19 [1]. The following reference may be included in the manuscript: 1. Le Stang, MB; Desenclos, J; Flamant, M; Chousterman, BG; Tabibzadeh, N. The Good Treatment, the Bad Virus, and the Ugly Inflammation: Pathophysiology of Kidney Involvement During COVID-19. Front. Physiol. 2021; 12: 613019. (DOI: 10.3389/fphys.2021.613019). (3) Format: There are 0 tables and 2 figures; (4) References: A total of 44 references are cited, including 43 references published in the last 3 years; (5) Self-cited references: There are 0 self-cited references. (6) References recommendations: The authors have the right to refuse to cite improper references recommended by the peer reviewer(s), especially those published by the peer reviewer(s) him/herself

	<p>(themselves). If the authors find the peer reviewer(s) request for the authors to cite improper references published by him/herself (themselves), please send the peer reviewer's ID number to editorialoffice@wjgnet.com. The Editorial Office will close and remove the peer reviewer from the F6Publishing system immediately. 2 Language evaluation: Classification: Grade 2B1A. A language editing certificate was provided. 3 Academic norms and rules: The signed Conflict-of-Interest Disclosure Form and Copyright License Agreement was not provided. No academic misconduct was found in the Google/Bing search. 4 Supplementary comments: This is an invited manuscript. The topic has not previously been published in the WJV. 5 Issues raised: The authors did not report whether this manuscript was supported by any grants. 6. The "Article Highlights" section is missing. Please add the "Article Highlights" section at the end of the main text. 7 Re-Review: Required. 8 Recommendation: Conditional acceptance.</p> <p><b>Company Editor-in-Chief:</b> I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Virology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors.</p>	
3	The fixed headings are copied.	[ Y ]
4	The title concisely summarizes the main topic of the study and is	[ Y ]

	not too long (no more than 18 words). Words such as ‘exploration’, ‘research’, ‘analysis’, ‘observation’, and ‘investigation’ are avoided. The title does not start with ‘The’ and does not include any Arabic numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
6	The authors' full family (sur)names and full/abbreviated first names are listed on the title page and are consistent with those listed in the signed BPG Copyright License Agreement form.	[Y]
7	The ‘Author contributions’ passage describes the specific contribution(s) made by each author. The author’s names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. <i>e.g.</i> , “Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript.”	[Y]
8	The ‘Supported by’ statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[N]
9	The ‘Corresponding author’ passage provides the corresponding author’s full first and family (sur)names, abbreviated title ( <i>e.g.</i> , MD, PhD), affiliated institute’s name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor	[Y]

	and date for each item, and contain no spelling errors.	
11	<p>The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows:</p> <p><u>Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight:</u></p> <p>Non-structured abstract that is no less than 200 words.</p> <p><u>Field of Vision, Case Report and Letter to the Editor:</u></p> <p>Non-structured abstract that is no less than 150 words.</p> <p><u>Research articles:</u> Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 words).</p>	[Y]
12	The 'Key words' list provides 5-10 keywords that reflect the main content of the study. The first letter of each keyword is capitalized, and each keyword is separated by a semicolon.	[Y]
13	<p>The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials. For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. <i>World J Gastroenterol</i> 2019; In press</p>	[Y]
14	The 'Core tip' provides a summary (less than 100 words) of the study that outlines the most innovative and important arguments and core contents of the paper and will serve to effectively attract readers.	[Y]

15	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [ <i>i.e.</i> , "...computed tomography (CT)". First-person pronouns ( <i>e.g.</i> , 'I', 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.	[Y]
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[N]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[N]
18	Statistical symbols are accurate. Statistical significance is expressed as <sup>a</sup> $P < 0.05$ , <sup>b</sup> $P < 0.01$ ( $P > 0.05$ usually does not need to be denoted). If there are other series of $P$ values, <sup>c</sup> $P < 0.05$ and <sup>d</sup> $P < 0.01$ are used, and a third series of $P$ values is expressed as <sup>e</sup> $P < 0.05$ and <sup>f</sup> $P < 0.01$ . Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	[N]

19	The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.	[ N ]
20	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.	[ N ]
21	The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.	[ N ]
22	The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup> reported .....", "Pan <i>et al</i> <sup>[2-5]</sup> indicated ....." ; "PCR has a high sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text ( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]).	[ Y ]

23	Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized ( <i>e.g.</i> , <i>Shijie Huaren Xiaohua Zazhi</i> ); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.	[Y]
24	The number of cited references is appropriate for the article type, as follows: <u>Commentary</u> : no less than 50; <u>Review</u> : no less than 100; <u>Article</u> : no less than 30/26; <u>Case Report and Letter to the Editor</u> : no less than 1.	[Y]
25	The ethics-related statements are provided in accordance with the manuscript type ( <i>e.g.</i> , Manuscript No.-Institutional review board statement, Manuscript No.-Animal care and use statement, <i>etc.</i> ).	[Y]
26	The names of the peer reviewers and the scientific editor are present at the end of the paper ( <i>e.g.</i> , P-Reviewer: Hugot D S-Editor: Wang JL).	[Y]
27	The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables ( <i>e.g.</i> , +, -, ×, ÷, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: <b>Figure 1</b> Pathological changes in atrophic gastritis tissue before and after treatment. A: ...; B: ...; C: ...; D: ...; E: ...; F: ....	[Y]
28	Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis	[Y]

	diagrams, PCR amplification curves, and survival curves.	
<b>29</b>	The author(s) highlighted the changes made to the manuscript according to the peer-reviewers' comments.	<b>[Y]</b>
<b>30</b>	The responses to the peer-reviewers' comments are consistent with the changes made to the manuscript.	<b>[Y]</b>
<b>31</b>	The revised manuscript is provided (file name: Manuscript No.-Review; <i>e.g.</i> , 870- Review). The letter of peer-reviewers' comments is provided (file name: Manuscript No.-Peer-review(s); <i>e.g.</i> , 870-Peer-review(s)). The response letter is provided (file name: Manuscript No.-Answering reviewers; <i>e.g.</i> , 870-Answering reviewers).	<b>[Y]</b>
<b>32</b>	The related ethics and relevant documents are provided, such as (1) Approved grant application form(s) or funding agency copy of any approval document(s) (file name: Manuscript No.-Grant application form(s)); (2) Biostatistics review certificate (file name: Manuscript No.-Biostatistics statement); (3) Conflict-of-interest statement (file name: Manuscript No.-Conflict-of-interest statement); (4) Clinical trial registration statement (file name: Manuscript No.-Clinical trial registration statement); (5) Institutional review board approval form or document (file name: Manuscript No.-Institutional review board statement); (6) Institutional animal care and use committee approval form or document (file name: Manuscript No.-Institutional animal care and use committee statement), and (7) Signed informed consent form(s) or document(s) (file name: Manuscript No.-Informed consent statement).	<b>[Y]</b>
<b>33</b>	All authors signed the BPG Copyright license agreement form (file name: Manuscript No.-Copyright license agreement; <i>e.g.</i> , 870-Copyright license agreement).	<b>[Y]</b>
<b>34</b>	The language certificate provided by authors who are non-native speakers of English meets the BPG requirements (file name:	<b>[Y]</b>

	Manuscript No.-Language certificate; <i>e.g.</i> , 870-Language certificate).	
35	The photos licensed in the Agreement for Use of Personal Photos are consistent with those in the paper (file name: Manuscript No.-Agreement for use of personal photos; <i>e.g.</i> , 870-Agreement for use of personal photos).	[N]
36	This document (Checklist of Responsibilities for Scientific Editors) has been saved under the file name: manuscript No.-Scientific editor work list ( <i>e.g.</i> , 870-Scientific editor work list).	[Y]
37	A <i>CrossCheck</i> investigation (an effective tool for detecting unoriginal content, enabling our editors to preserve the journal's integrity and the authors' copyright) has been performed for the manuscript <i>via</i> the website: <a href="http://www.ithenticate.com/">http://www.ithenticate.com/</a> . The results document contains the following information for the manuscript: "Name of journal", "Manuscript No.", "Columns", "Title" and "Author list". The Figure of the <i>CrossCheck</i> results is saved in JPEG format (.jpg) at 1440 × 680 pixel resolution. The PDF of the <i>CrossCheck</i> results has been saved under the file name: manuscript No.- <i>CrossCheck</i> report ( <i>e.g.</i> , 870- <i>CrossCheck</i> report). The Google searches have also been performed to further ensure publication of original content.	[Y]
38	The text of the manuscript is typed in Book Antiqua font, 12 pt, with 1.5 line spacing.	[Y]
<b>Responsibilities of scientific editors</b>	The primary responsibilities of our scientific editors include carefully checking the entire manuscript and all accompanying materials for: (1) errors in spelling, grammar, punctuation and wording; (2) suitability of tables, figures, figure data and legends; (3) accurate and appropriate presentation of symbols ( <i>e.g.</i> +, -, ×, ÷, %, *) in tables and figures; and (4) complete and comprehensive revision of the manuscript according to the reviewers' comments.
