

Pisa October 21, 2021

To whom may be interested,

This is to certify that the ARPA Foundation approves the observational study on patients operated for pancreatic ductal adenocarcinoma (PDAC) entitled: "*Detailing the ultrastructure's increase of prion protein in pancreatic adenocarcinoma*", with the aim of analyzing quantitative stoichiometry and compartmentalization of prion protein in PDAC cells and to correlate its presence with prognostic data.

The President

Prof. Luca Morelli

Pisa October 21, 2021

To whom may be interested,

This is to certify that the Tizzi Foundation approves the observational study on patients operated for pancreatic ductal adenocarcinoma (PDAC) entitled: "*Detailing the ultrastructure's increase of prion protein in pancreatic adenocarcinoma*", with the aim of analyzing quantitative stoichiometry and compartmentalization of prion protein in PDAC cells and to correlate its presence with prognostic data.

The President

Dr. Guido Giannecchini
