SPECIFIC COMMENTS TO AUTHORS

In this manuscript entitled "GASTROINTESTINAL TUMORS SECONDARY TO INFECTIOUS AGENTS", Miriam López-Gómez et al have reviewed the role of viral and bacterial infection in gastrointestinal malignancy. Although this manuscript covers a broad range of gastrointestinal infections and carcinogenesis, it lacks the novelty that may help advance the research or management of gastrointestinal malignancy. It would be helpful if the authors could provide more in-depth and insightful discussions. In addition, the title does not reflect the main subject of the manuscript since there is no strong evidence to support that viral or bacterial infections cause some gastrointestinal cancers mentioned in the manuscript.

SPECIFIC COMMENTS TO AUTHORS

1. The manuscript is a good effort to summary the infectious pathogens associated with cancer. But the recent papers of 2021 need to be included in the study. 2. Only 20% of the references were in the past five years. 3. The article is too long ,and need to right size and polish the english expression.
