SPECIFIC COMMENTS TO AUTHORS

This is a well-organized review paper. However, it will be easier to understand if you correct the following: 1. Right-sided infective endocarditis (RSIE) and Tricuspid Valve Endocarditis are expressed as they are the same. 2. In the epidemiology section, it is better to describe intravenous drug use (IVDU) and cardiac implantable electronic device (CIED) separately.

SPECIFIC COMMENTS TO AUTHORS

This is a well-written update on tricuspid valve endocarditis focusing on the role of multimodality imaging and the management of these patients. The majority of references quoted were within the past 5 years. The figures presenting typical cases were obtained with latest imaging models and techniques, and the tables comparing strengths and weakness of multimodality imaging techniques were comprehensive.
