## Neurofibromatosis type 1

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2716546>

Introduction. **Neurofibromatosis** type 1 (NF1) is an autosomal dominant, multisystem disorder affecting approximately 1 in 3500 people. The earliest historical evidence first appeared in the 13 th century but it wasn't until Friedrich Daniel von Recklinghausen published his landmark paper (in German) On the Multiple Fibromas of the Skin and Their Relationship to the Multiple Neuromas in 1882 ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3679682>

May 15, 2001 · Diagnosis of **NF1** was easy in four of our **cases** because of **neurofibromatosis**, skin pigmentation and various skeletal abnormalities. These stigmas of **NF1** were lacking in one **case**, and the only clue to the diagnosis was ovoid bone defects of the skull vault. Diagnosis was made by performing biopsy of scalp **neurofibromas** incidentally found on CT.
