

PEER-REVIEW REPORT

Name of journal: World Journal of Hepatology

Manuscript NO: 67756

Title: Pediatric non-cirrhotic portal hypertension: endoscopic outcome and perspectives from developing nations

Reviewer's code: 05237568

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Poland

Author's Country/Territory: India

Manuscript submission date: 2021-04-30

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-05-17 13:08

Reviewer performed review: 2021-05-21 18:28

Review time: 4 Days and 5 Hours

SPECIFIC COMMENTS TO AUTHORS

Non-cirrhotic portal fibrosis (NCPF) is a rare cause of pediatric portal hypertension. There is abundant literature in adults but paucity of data in children. In *Hepatol Int* 2020; 14(2):281-287 authors from the same center (Sanjay Gandhi Postgraduate Institute of Medical Sciences, Lucknow) presented endoscopic and long-term outcomes of forty-five children with NCPF. In the above manuscript they made a great effort to summarize their own experience and literature review and they proposed algorithm for management of varices, portal cavernoma cholangiopathy and indications for surgical approach in extra-hepatic portal vein obstruction pediatric patients. I think it is a new concept in this study. And it is worth to be spread to other centers.
