

June 18, 2021

Dear reviewers:

We appreciate the suggestions made to our article, which were incorporated in the final version:

- 1- "Line 101, CT enterography should be added, based on bibliographic reference 8." *CT enterography was added*
- 2- "Line 148, bibliographic references should be added regarding the validation of Lewis Score and CECDAI." *Bibliographic references were added*
- 3- "Line 154, it should be stated that the final result of the Lewis Score corresponds to the tertile with the highest score, in addition to the stenoses score." *This sentence was added*
- 4- "Lines 332 e 335, should be added reference to the article: "Monteiro S, Castro F D, Carvalho P B, Rosa B, Moreira M J, Pinho R, Saraiva M M, Cotter, J. Essential role of small bowel capsule endoscopy in reclassification of colonic inflammatory bowel disease type unclassified, World J Gastrointest Endosc 2017; 9 (1):34-40." *This reference was added*
- 5- "The authors should emphasize, based on the available literature, the importance of capsule enteroscopy findings towards a change in patients' therapeutic management." *We emphasize this point in a paragraph at the end of the section "panenteric capsule".*

Best regards,

Rodrigo Quera Pino, MD
