SPECIFIC COMMENTS TO AUTHORS

This is an excellent review article about the use and potentialities of capsule endoscopy in Inflammatory Bowel Diseases. A few reviewing suggestions: 1- Line 101, CT enterography should be added, based on bibliographic reference 8. 2- Line 148, bibliographic references should be added regarding the validation of Lewis Score and CECDAI 3- Line 154, it should be stated that the final result of the Lewis Score corresponds to the tertile with the highest score, in addition to the stenoses score. 4- Lines 332 e 335, should be added reference to the article: “Monteiro S, Castro F D, Carvalho P B, Rosa B, Moreira M J, Pinho R, Saraiva M M, Cotter, J. Essential role of small bowel capsule endoscopy in reclassification of colonic inflammatory bowel disease type unclassified, World J Gastrointest Endosc 2017; 9 (1):34-40” 5- The authors should emphasize, based on the available literature, the importance of capsule enteroscopy findings towards a change in patients’ therapeutic management.
