

To our reviewers,

We thank you for taking the time to read our manuscript and offer suggestions for improvement. Below is the stated suggestion with an explanation of how it was addressed in the manuscript.

Reviewer 1:

I have reviewed the Peer-Review Report, the full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Gastroenterology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Before final acceptance, the author(s) must add a table/figure to the manuscript.

We added a figure to delineate the qualities of a sessile serrated lesion that are important to take note of when performing a colonoscopy.

We thank the reviewers again for their time and for the suggestion that they have offered. Please let us know if we have adequately addressed all concerns.

Sincerely,

A handwritten signature in black ink that reads "Alexa Trovato". The script is fluid and cursive, with the first letters of "Alexa" and "Trovato" being capitalized and prominent.

Alexa Trovato
