

Dear reviewers and editors,

The comments have been carefully taken into account and a new revised submission have been uploaded. The responses are as follows,

To reviewer:

The side effects mentioned in the reported studies were listed in detail and the data was calculated. This part was added in the first paragraph of the Discussion.

To editor:

To question (1): We uploaded the original file of the figure in the article. We are sorry but the low resolution of the computed tomography images from our hospital is not up to the image standard.

To question (2): The output of the reference list had been revised and uploaded. PMID and DOI numbers and all authors are listed in the reference list.

To question (3): The patient's name, address, birthday, address, ward, bed number, hospital number and other private information were hidden. The informed consent form was revised and uploaded.

Sincerely,

Jinfa Tou
