#### **SPECIFIC COMMENTS TO AUTHORS**

The manuscript is well-written with elaborate discussion of a rare orodental presentation of Moebius Syndrome. Clinical description was very detailed. The author was able to impart new knowledge on how to manage a patient with MBS who presents with dental complications of the said syndrome. I appreciate the excellent writing, including grammar and review of literature.

#### **SPECIFIC COMMENTS TO AUTHORS**

The authors present a paper describing the Dental management of a patient with Moebius syndrome. There are a few major issues that should be addressed by the authors before consideration for publication: 1. Your references are too old and most of them were related to before 2010. You really need to update them, particularly during discussion. 2. According to the title, the readers expect to get something new regarding the management of dental problems during MBS but in the conclusion section of the abstract, you just emphasized early diagnosis of disease. 3. The introduction was too long for a case report. For example, you do not need to talk about the different etiologies of the disease. Talk directly about issues related to your article and the importance of expressing it. 4. The authors should explain how their findings make a difference for physicians around the world and the readers of the World Journal of Clinical Cases?
