

Dear Editor and reviewers,

Thank you very much for your comments and advice on revision. The auto-generated text is not handling equations and tables very well, so we have uploaded the revised manuscript as "supplementary material". We also made a PPT presentation for each of the tables and images used uploaded as "image file" here.

Thank you very much for your consideration, we are very excited for this opportunity.

Kind regards,

Mohammed Hussein Kamareddine, M.D.
