The 'RESULTS' section concisely describes the observational and	
experimental results. Representative data and data that have	
scientific significance are emphasized. Data is presented in either	
the text, a table or figure (i.e., chart, diagram, graph or image), but is	[N]
not repeated among each. Information presented in the tables and	
figures clearly describes the trends, meaning, and inferences.	
Results described in textual form are accurate, concise and clear.	
Statistical symbols are accurate. Statistical significance is expressed	
as ${}^{\rm a}P$ < 0.05, ${}^{\rm b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).	
If there are other series of $P$ values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[N]
and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.

The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.  The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (i.e., providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (i.e., useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.
